Professional Summary

Software engineer with 3+ years of professional experience building full-stack web applications, REST APIs and developer tools in TypeScript, JavaScript, React, Next.js, Node.js and PostgreSQL, with systems programming in Rust. Founder and lead architect of LegacyExodus, a static analysis engine that maps legacy JavaScript and TypeScript codebases (AST, control-flow and data-flow graphs) for safe software modernization. Experienced with Docker, Linux, CI/CD and Cloudflare Workers.

Technical Skills

Languages: TypeScript, JavaScript, Rust, SQL, HTML, CSS
Frontend: React, Next.js, Tailwind CSS, responsive web design
Backend: Node.js, Express.js, Bun, REST APIs, JWT authentication, Stripe, Appwrite
Databases: PostgreSQL, MongoDB, MySQL, SQLite, Cloudflare D1
Cloud and DevOps: Docker, Linux, Git, GitHub Actions, CI/CD, Cloudflare Workers, Cloudflare R2
Static Analysis: Tree-sitter, abstract syntax trees (AST), control-flow graphs (CFG), data-flow graphs (DFG), intermediate representation, dependency analysis
Practices: System design, software architecture, automated testing, code review, Agile, Scrum, LLM integration

Professional Experience

Founder & Lead Architect

LegacyExodus | Remote | Aug 2026 – Present

- Architected a deterministic static analysis pipeline in TypeScript that parses JavaScript and TypeScript into ASTs, control-flow and data-flow graphs and an intermediate representation.
- Analyzed Ghost v6.73.0, mapping 7,172 files and 415,492 function calls in a single 183-second run, with 13 of 13 output artifacts byte-identical on rerun.
- Built a test suite of 22,411 assertions with 0 failures, and designed the engine to run on the customer's machine with zero network calls.
- Leading the Migration Readiness Assessment product and research into automated test generation and quantum-safe encryption.

Independent Software Engineer

Freelance | Lahore, Pakistan | Feb 2024 – Jul 2026

- Delivered freelance web development projects for clients.
- Built Rust and systems engineering projects and took part in hackathons.

Full-Stack Web Developer

Tech Vertex | Remote | Feb 2023 – Jan 2024

- Optimized React, TypeScript, Node.js and Express.js applications, reducing latency by up to 50% while maintaining 99.9% uptime.
- Designed JWT-secured REST APIs and integrated Stripe payments and Appwrite services.

Frontend Engineer (Apprentice)

Iridium Soft | Lahore, Pakistan | Jun 2021 – Jan 2023

- Developed reusable React and JavaScript components for responsive, cross-browser web applications.
- Participated in code reviews, Agile sprints, debugging and technical documentation.

Projects

Raavi Volt – E-commerce Store | Next.js 16, Bun, Tailwind CSS, Cloudflare Workers, D1, R2

- Built a full e-commerce store with product catalogue, cart, admin panel and bank transfer and Raast QR payments, deployed serverless on Cloudflare.

Annemarie-Schimmel-Haus Lahore – Bilingual Website | Next.js 16, PostgreSQL 17, Cloudflare Workers

- Built an English and German website with event registration, a visitor chat guide and a staff admin for courses and events.

LegacyExodus Analysis Sample – Open Source | TypeScript, Bun

- Published a deterministic control-flow and reachability analysis sample with invariant validation, covered by 86 passing tests.

Open Source Contributions

freeCodeCamp (merged pull request #69385); MDN Web Docs German translation (pull request #281); Kana Dojo (pull request #27003)

Education

Bachelor of Science in Software Engineering

University of Management and Technology (UMT), Lahore | Sep 2022 – Nov 2026 (expected) | Grade: A

Certifications and Languages

HackerRank Software Engineer Certificate (2026); Anthropic Claude Code in Action (2026); Cisco Introduction to IoT (2026)
Languages: English (professional), Urdu (native), German (A1, studying A2)
